LinkedIn Recommendation Post:

Top qualities: **Expert, High Integrity, Creative**

"I highly recommend Larry. My wife and I are very honored to have been able to work with him. He has helped facilitate our project in so many ways.

In 2011, we purchased an original Addison Mizner cottage in Boca Raton, Florida. He has worked with us to create the perfect adaptive use design to bring the home to modern standards while ensuring the historic value of the home is retained.

Through the smart use of design details and computer assisted design he was instrumental in helping us gain historic designation for the home. His design skills and building knowledge are superlative. He is much more than a conceptual architect. He understands the entire building process and will help you see your project through to the end.

Working with Larry is an absolute pleasure." *August 8, 2012*
